

Dr Antonarakis completed his degree in dentistry at the University of Wales in Cardiff, UK, and his four-year orthodontic specialty training at the University of Geneva, Switzerland. He subsequently received his PhD from the University of Gothenburg, Sweden, and then undertook clinical fellowship training in cleft and craniofacial orthodontics at the Hospital for Sick Children in Toronto, Canada. Dr Antonarakis then returned to the University of Geneva, Switzerland where he first completed his habilitation at the Division of orthodontics and has recently been appointed associate professor. His clinical and research interests include cleft and craniofacial orthodontics, treatment of patients with juvenile idiopathic arthritis, as well as orthodontics for individuals with special needs.
